Product information sheet Foldable Grid

Item no. 238483

Benefits

- Enhances more design-focused sinks and bowls with an additional working level that increases usability without affecting the visual clarity of the bowl – a strong upselling opportunity for premium installations.
- Can be positioned on the drainer, over the bowl or beside the sink to support various preparation and cleaning workflows. Standardised outer dimensions and non-slip silicone pads ensure reliable placement in everyday use.
- Brushed stainless steel combined with dark grey silicone creates a premium look that matches stainless steel bowls and complements SILGRANIT and Velgranit bowls with stainless steel components, supporting a colour-harmonised BLANCO UNIT.
- Fits all BLANCO sinks and bowls with a 400–420 mm front-to-back bowl dimension and base units from 500 mm upwards (e.g. BLANCO CLARON), reducing complexity for retailers and planners.
- Serves as a heat-resistant trivet for hot cookware (up to 200 °C), expanding the functional value of the sink area and supporting cross-selling with cooking appliances.
- When folded inside the bowl, it provides a defined area for drying dishcloths while keeping the bowl usable for filling water or rinsing - a practical benefit for compact kitchens.
- The compact folding format enables efficient, space-saving storage – for example, in the BLANCO SELECT Orga Shelf 60 or the BLANCO Storage Bag 40.
- Premium, food-safe materials reduce care-related objections and support long-term ownership.
- Foldable grids are internally tested by BLANCO LABORATORIES GERMANY, fulfilling the BLANCO QUALITY PROMISE and ensuring durable, reliable performance over time.
